

SECTION SF 30 BLOCK 14 CONTINUATION PAGE

SUMMARY OF CHANGES

Changes in Section SF 30

REVISED

Specifications Section 02881

1.2 CHARACTER OF MATERIALS

Bidders are expected to examine the site of work and decide for themselves the character of the materials. The Contractor may encounter previously undredged material at the required Base Bid depth. The Cape Henry Channel has historically been dredged to 51 feet with 1 foot of allowable overdepth. Dredging below these depths in Cape Henry Channel should be anticipated to constitute new work dredging. Subsurface explorations to determine the character of materials to be removed have been made by the Government. Although the results of these explorations are representative of subsurface conditions at their respective locations and for their vertical reaches, local minor variations in the subsurface materials are to be expected and, if encountered, will not be considered as being materially different within the purview of Contract Clause "DIFFERING SITE CONDITIONS". Cores and samples obtained by the Government and the results of subsurface investigations are available for inspection in the GeoEnvironmental Branch at the Norfolk District. The records of previous dredging are available in the Operations Branch, Norfolk District, Corps of Engineers, 803 Front Street, Norfolk, Virginia 23510-1096."
